## COLD REMEDIES SOLD IN CANADA CONTAINING PPA November 8, 2000

The following is a list of cold remedies that contain **phenylpropanolamine (PPA)** in Canada. Consumers and health professionals are advised to check active ingredients on the product label to confirm. Health Canada and the US Food and Drug Administration have issued warnings about the rare risk of hemorrhagic stroke with PPA, especially in women under age 50. **Cold products containing pseudoephedrine (e.g. Sudafed®) have not been associated with this risk, and are generally considered safer.** PPA is not currently included in appetite suppressants in Canada.
